

# AIRGUN INCIDENTS

2009

Compiled by Gun Control Network  
Last update – 31 December 2009

GCN compiles lists of gun incidents from media articles and reports. The following is a list of those incidents reported to have involved air weapons. We know that this doesn't include every offence committed in Great Britain but believe it provides an appropriate reflection of the seriousness of their role in crime and anti-social behaviour.

Among the aspects of airgun crime and misuse apparent from these incidents the following are particularly noteworthy:

- Young people and females are frequent victims in airgun shootings.
- Although a number of the incidents which lead to court cases do involve young men armed with airguns, the weapons are also being used by many older men to commit serious crimes.
- The incidents have a wide geographical distribution and, unlike some other gun crime which is concentrated in metropolitan areas, they affect communities across the country.
- There have been four fatalities, a teenager who was shot with an air rifle in his garden, a 5-year-old boy killed with an air rifle in the grounds of a house he was visiting, a 10-year-old who was shot whilst playing "cowboys and Indians" and a woman who killed herself a day after purchasing an air rifle.
